Dave Slichter, MSc., MBA  
Program Coordinator  
Business Administration: Supply Chain and Operations Management

As an ongoing review process High Performance Solutions certifies that graduates of the Business Administration: Supply Chain and Operations Management (Co-op and Non Co-op) Program meet the requirements for a 6 Sigma Yellow Belt. Within the context of the program and its theme of 'continuous improvement', the Lean Concepts and Continuous Improvement (OPER3225) course in conjunction with the Value Stream Mapping (OPER3235) course, the Leadership and Team Building (MGMT3075) course, and the Statistics (MATH2250) course offered by Conestoga College provide students with the knowledge and practical skills to immediately add value to any organization. Incorporated in the aforementioned courses are the completion of three (3) applied projects; A Capability Study, 6 Sigma case study and the Valued Stream Mapping consulting project.

We would like to review the material in three years to ensure the Program content continues to meet the Yellow Belt requirements. The next review would be completed by December 31, 2019.

Regards,

Scott Smith, MBA  
President
